Hi Kira:

I have reviewed and added to your list. The revised version is attached. Thanks for the opportunity to add our sites. I do like the idea of getting the STLs aware of the optimization work and now that we have added our current site load, further reviews should be easier. I take this as a living document that would be updated periodically. Do you have a schedule for updating, like quarterly or biannually..?

Thanks,

Kirby

Hi

We are moving forward with finalizing a first draft of the tracking spreadsheet to put on the skydrive for everyone this week. Kirby I know that you were looking at whether we captured all the optimization sites that are ongoing or completed this year have you completed this review? Dave and John have you QCd to make sure all the tech support center projects are listed? You can give any comments or additions needed directly to Valerie. I think Felicia has completed her review and contacted the STL that needs to add info for the SCMTSC. Thanks for all your help on this I know it will be a useful tool. We are also interested to find out if you have any format questions or comments. The STLs will be responsible for updating this table monthly and it will be on the skydrive for all to access.

Subject: STL Site Technical Support Tool

Hi Everyone,

Thanks for your submissions and comments on the STL Site Tool template. We plan to finalize a first cut of the populated tool by July. Kira, Felicia and I will provide a brief update for the STL's this Thursday. We'll have a broader discussion on the 6/20 STL call based on review of the consolidated table.

We've made minor changes to address STL, OSWER partner, OSP, and TSC Director suggestions that include:

- Addition of a State Column to ease in searching/sorting; and
- Clarification of specific content to include in each field with addition of technologies and SSID (see the tab "Notes for STL Assistance").

STLs- please take a moment to review the changes as the clarifications may require some updates. For example, we've further defined the difference between the "Project" and "Brief Notes/Benefits" columns. Also, we've asked that a description of the technology being evaluated or used be included in the "Project" description.

Dave, John, Felicia, Dan, and Greg,

As a next step, we'd appreciate your review in the next couple weeks to share any additional key support activities you're aware of with the appropriate STL (and copy me if you would). We'd also like to invite you to join us on the 6/20 STL Call (11-12:30 am) to share your impression and our plans for periodic updates, etc. (look for Terry Burton's invite as our June STL call leader).

Please let Felicia, Kira, or I know if you have questions and thanks again,

Valerie
